The MIT SCM Program is designed for early career supply chain and industrial engineering professionals who wish to go back to school to receive advanced training in supply chain management and analysis. It is an intense 10-month study program that includes coursework, a company-sponsored thesis project, and international travel to one of MIT’s SCALE Centers in Europe, South America, or Asia. The SCM program enables young professionals to obtain higher-level, more interesting jobs. Recent graduates have received a significant, average salary boost of over 70%. **Supply Chain Excellence Award**

[$25,000 Scholarship (winner)]($25,000 Scholarship (winner))

[$10,000 Scholarship (honorable mention)]($10,000 Scholarship (honorable mention))

- Given annually at the Pennsylvania State University to the most outstanding graduating senior majoring in Supply Chain and Information Systems or Industrial and Manufacturing Engineering
- Provides a tuition scholarship towards the MIT Supply Chain Management (SCM) Master’s Degree Program

**Application Deadline March 1, 2018**

---

**The Fine Print**

Restricted to U.S. citizens. Winning student is required to apply and be accepted into the MIT SCM program. The SCM program requires 2-5 years of prior work experience. Winners, Honorable Mentions and any other talented students can apply to the MIT SCM program immediately to secure their seat in a future class (admission with deferred enrollment). Demonstrated coursework in quantitative analysis is a plus. Scholarship offer expires after 5 years. Nominees for the MIT SCM Excellence Award will be contacted by the partner school faculty and asked to submit a resume, transcript and short essay. Nominees will have a personal Skype chat with the MIT SCM director. Winners will be selected jointly by the partner school and MIT. Award presentation happens shortly prior to school’s graduation ceremony.
