About the MIT Supply Chain Management Program

The MIT Supply Chain Excellence Award is given annually at Iowa State to the most outstanding graduating senior majoring in Supply Chain Management or Industrial and Manufacturing Systems Engineering.

The award provides a tuition scholarship towards the MIT Supply Chain Management (SCM) Master’s Degree Program of $25,000 to the Winner and $10,000 to any Honorable Mentions that are named.

The award is restricted to US Citizens. Demonstrated coursework in quantitative analysis is a plus. To use the scholarship, the winning student is required to apply and be accepted into the MIT SCM program. Although the SCM program requires 2-5 years of prior work experience, the winner and other talented Iowa State students can apply to the MIT SCM program immediately to secure their seat in a future class (admission with deferred enrollment). The scholarship offer expires after 5 years.

Nominees for the MIT SC Excellence Award will be contacted by the Iowa State faculty and asked to submit a resume, transcript, short essay and then chat with the MIT SCM director on Skype. The final selection will be made jointly by Iowa State and MIT. Announcement of the winner is made shortly prior to Iowa State’s graduation ceremony.
