MANAGEMENT

# CAREER OUTCOMES

CLASS OF 2023

Dear Readers and Future Alumni,

I am delighted to present Employment Outcomes for the Class of 2023.

The demand for experienced supply chain leaders has never been greater as evidenced by the breadth of industries and companies recruiting from the class of 2023. In a challenging economy, 97% of our students received an offer within 90 days of graduation and 94% of the class accepted job offers in the US, reaffirming the distinction of our MIT Supply Chain Management Master's Program.

Additionally, our students reaped the benefits of their hard work, with an average base salary of \$140,578, a testament to the high demand for supply chain professionals. Our success wouldn't be possible without the enduring support and dedication of our SCM alumni, who continue to be a vital part of our community throughout the year. Our 10-month cohort-based MS Supply Chain Program consistently delivers exceptional returns on investment for both our students and corporate partners.

If you'd like to be a part of our program, don't hesitate to contact me at [lmorrison@mit.edu](mailto:lmorrison@mit.edu).

Warm regards,

A handwritten signature in black ink that reads "Len Morrison". The signature is written in a cursive, flowing style.
